

# 1.26.1.1 Hotfix Release Items: February 2022

Icons below indicate the application(s) impacted by the enhancement.

## Cross-Suite Impacts

System temporarily unavailable without change.

To complete system fixes specific to the Data Safety application, the suite of applications will be unavailable during the evening of the [system update](#). No changes to OAIR, ESTR-IRB, or Agreements-DUA will occur during this time.

## Data Safety

The support team has implemented corrective measures impacting the below-listed components of the Data Safety application. **The following known bugs persist, and the team continues to work on managing corrective actions.**

- Documents added to an amendment submission via “Upload Revision” will not copy to the parent record upon amendment approval.
- Certain team members added to projects via an amendment created between November 2021 and February 2022 may not be able to edit items in review.

If any of these issues arise, please contact [rshelp@harvard.edu](mailto:rshelp@harvard.edu) to implement per-project corrections.

What has changed...	What it means...
<b>SmartForm</b>	
Data information details question/prompt numbering updated	<ul style="list-style-type: none"><li>• Numbering values rendered incorrectly on the data details pop up.</li><li>• This view has been updated to display correctly, in order and without duplicate numbers.</li></ul>
Related projects list removed from the study team page	<ul style="list-style-type: none"><li>• Related projects display disrupted entry of information during amendment.</li><li>• To view current related projects, visit the main workspace Related Projects tab.</li></ul>
<b>Workspaces</b>	
Contacts tab on initial submission updated to reflect submission type information	<ul style="list-style-type: none"><li>• Approved team members on approved projects are listed on the contacts tab when viewing the Initial/ Main and Continuing Review workspace.</li><li>• Revised team lists associated with an Amendment or Amendment/CR in review now display on the amendment and Amendment/CR workspace for easy reference.</li></ul>

## What has changed...

## What it means...

### Notifications

Continuing review approaching and continuing review lapse notice text updates.

Instructions now reference appropriate actions to request continuing review or closure for records approaching the approval end date.

### Miscellaneous- Bug Fixes

Record access updates

- Some individuals who were added to the team did not always receive the corresponding record access and permissions when the submission was approved.
- Access will be corrected for these impacted team members and the issue is addressed for newly added team members.

Related project listing updates

- Related projects that were changed following initial approval were potentially removed by subsequent amendment activity. The removal was only reflected on the Data Safety side and impacted projects will be corrected.
- A change to the SmartForm paired with the data migration will correct all current projects impacted by this bug. Moving forward related projects will remain associated independent of amendment activities.
